

Joint Biometric Dataset – LivDet 2013 Liveness Detection-Iris – Warsaw Subset Release Agreement

Introduction

“Joint Biometric Dataset – LivDet 2013 Liveness Detection-Iris – Warsaw Subset” (henceforth, “Warsaw Dataset”) is an independent set of data prepared by Warsaw University of Technology in Poland (henceforth, “WUT”) and deployed in liveness detection competition LivDet-Iris 2013. Warsaw Dataset gathers images of living irises and images of paper printouts corresponding to the living irises (hence each fake sample has its authentic counterpart), as well as results of iris segmentation. The general aim of preparing and sharing the Warsaw Dataset is to help researchers in their development and evaluation of presentation attack detection algorithms. WUT owns copyright of the Warsaw Dataset and serves as the source for this data.

Release of the database

Warsaw Dataset is available on a case-by-case basis. Records of the Warsaw Dataset are made available to researchers only after the receipt of a completed release agreement signed by the researcher’s institution on behalf of the individual researcher or research unit. Warsaw Dataset records are released via an Internet site. By signing this agreement the requestor agrees to comply with the restrictions listed below. Any failure to conform to these restrictions results in a denied access to Warsaw Dataset. There is no charge for data made available and downloaded via the Internet.

Consent

Restrictions for use of the Warsaw Dataset:

- 1. Requests:** All requests for the Warsaw Dataset records are submitted to WUT in writing.
- 2. Redistribution and Modification:** The entire or part of the Warsaw Dataset will not be modified and further distributed, published, copied or disseminated in any way or form, either for profit or not. This refers also to further distribution of the dataset records to any other facility or unit within the requesting organization, other than the one mentioned in the request.
- 3. Publication Requirements:** No more than 10 images included in the Warsaw Dataset will be published in reports, papers and other documents. No biometric data will be used in a way that can embarrass, discomfort or anguish the original subject. Copy of all reports, papers or any other documents that use Warsaw Dataset, must be submitted immediately upon release or publication to WUT.
- 4. Commercial Use:** Warsaw Dataset is made available exclusively for research purposes, and may not be used in any commercial activity. In particular, the Warsaw Dataset or its part may not be used to promote any product or technology.
- 5. Citation:** All documents and papers that report on research that uses the Warsaw Dataset will acknowledge the use of the data by citing the following paper:

Adam Czajka, “Database of Iris Printouts and its Application: Development of Liveness Detection Method for Iris Recognition”, Methods and Models in Automation and Robotics (MMAR), 2013 18th International Conference on, Poland, August 26-29, 2013, pp. 28-33
